## Project Summary

I build a webpage for one of my favourite movies, “Scooby Doo 2: Monsters Unleashed”

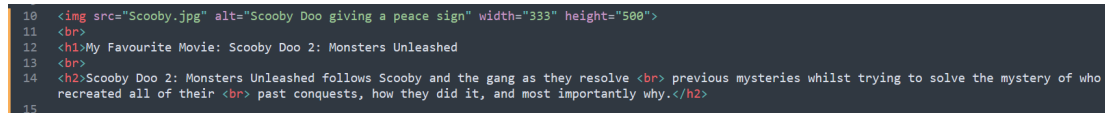

I started by finding and adding the image to the top of the webpage. I downloaded the photo and added it to my code by putting it in the same folder and linking it.

 A screenshot of the code

I added `alt="Scooby Doo giving a peace sign"` into the code to ensure that people with screen readers can still understand the image as well. Another reason I added it was in case there is an issue loading the image, there is a description of the image included.

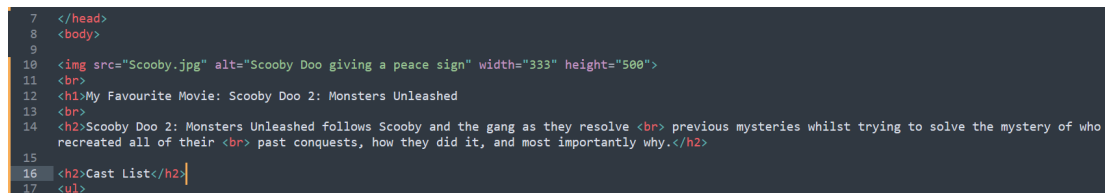

I also used the width and height attributes to make sure the image was the correct size for the webpage.

I used `<br>` to separate the sections of text on the webpage between the image, my heading (`<h1>`), and the second heading (`<h2>`) sections.

 A screenshot of the code

A screenshot of the code

I also added blank lines in the code to make it easier for me to read.

 A screenshot of the code

A screenshot of the code

I used an unordered list (`<ul>`) to make the cast list, along with the tag `<li>` to list each cast member.

```

15
16 <h2>Cast List</h2>
17 <ul>
18 <li>Velma - Linda Cardellini</li>
19 <li>Shaggy - Matthew Lillard</li>
20 <li>Fred - Freddie Prinze Jr.</li>
21 <li>Daphne - Sarah Michelle Gellar</li>
22 <li>Scooby Doo (Voice) - Neil Fanning</li>
23 </ul>
24

```

*A screenshot of the code*

I put my favourite quote in a paragraph (<p>) and used breaks to separate the different parts of the quote.

```

24
25 <h2>Favourite Line From The Movie</h2>
26 <p>Shaggy: [Scooby slaps Shaggy] "I needed that." <br>Shaggy: [Scooby slaps Shaggy again] "I needed that, too." [Scooby punches him] <br> Shaggy: [
27 Shouts] "You're pushin' your luck Scoob!"

```

*A screenshot of the code*

For the ranking section, I used <progress> and set each of the “value” and “max” sections to the appropriate values.

```

27
28 <h2>Movie Ratings</h2>
29 <p>according to my friends and family<p>
30 <p>Cast <progress value="10" max="10"> </p>
31 <p>Story <progress value="10" max="10"> </p>
32 <p>Humor <progress value="10" max="10"> </p>
33 <br>

```

*A screenshot of the code*

At the bottom of my webpage, I added a highlighted “note to self” using <mark> as well as I added my initials and the date.

```

33 <br>
34 <p><mark>Note To Self: Watch Every Day Of Your Life</mark></p>
35 <br>
36 <p>Z M L G L 2023-02-02</p>
37 </body>
38 </html>

```

*A screenshot of the code*

The last thing I did was add a “favicon” or the image on the tab. I did this by finding a transparent png file of the image I wanted, and I added it the same way as I did the regular image, only adding the <type> and <rel> attributes.

```

1 <!DOCTYPE html>
2 <html>
3 <head>
4 <title>Zoey's First Page - Puppy Power</title>
5 <link rel="icon" type="image/x-icon" href="Scrappy Dappy Doo.png">
6
7 </head>
8 <body>

```

*A screenshot of the code*

## Conclusion

I tried to separate my code into each of the sections to make it easier to read, and I really like the colour-coded functions of sublime text (the code processor I use). The only part that I had any real difficulty with was sizing down the image at the top of the page to the correct proportions. At first, adding the favicon was difficult, mostly because I didn't know what attributes to add, but I got the hang of it quickly. Overall, I'm very impressed with myself and the work I put into this project. I tried to keep the SEO in mind while creating this webpage by keeping it simple and on topic.
